SUMMARY

Graduated with a degree in Management Information Systems (MIS), possessing strong competencies in data analytics, business intelligence, and business analysis. Acquired hands-on experience in data processing and corporate reporting utilizing SSMS, PostgreSQL, Oracle DB, Excel, SPSS, and Power BI during internships. Bridged the theoretical framework with practical applications by developing an end-to-end Data Science project. Aims to drive organizational value through analytical proficiency by integrating contemporary artificial intelligence technologies into business workflows.

WORK EXPERIENCE

Data & Business Analyst Intern – Ulusal Faktoring A.Ş.

February 2026 – July 2026

- Managed operational workflows and cross-departmental coordination by leveraging Jira and CRM tools.
- Participated in data analytics pipelines to generate consistent and reliable outputs driving strategic business decisions.

Sales and Marketing Intern – Tnc Group A.Ş.

December 2025 – January 2026

- Gained practical exposure to technical sales and data reporting processes utilizing Power BI, CPM, and IFS software.
- Engaged in the analytical evaluation and market research of digital transformation, new media, and social media marketing strategies.

Data Analyst Intern – Ulusal Finans Teknolojileri A.Ş.

July 2025 – September 2025

- Conducted advanced data analysis and reporting via PostgreSQL and Excel through comprehensive examination of Data Warehouse (DWH) architectures.
- Contributed to data migration and conversion processes transitioning from PostgreSQL environments to Oracle DB infrastructures.
- Explored the optimization of business processes and technical analytics via artificial intelligence (AI) integration frameworks.
